sofiaruiz1801.github.io

PROFESSIONAL SUMMARY

Full Stack Developer building **end-to-end products across backend, web, and mobile**, with hands-on experience shipping **applied AI features** to production. Designs and implements **scalable backend services and REST APIs with Node.js (Express, NestJS) and TypeScript**, web frontends with **React / Next.js**, and mobile apps with **React Native (Expo)**. Practical experience with **applied AI** — RAG (Retrieval-Augmented Generation) pipelines over **pgvector**, **multi-agent LLM orchestration**, and **streaming (SSE) chatbots** — plus complex third-party integrations (Google Calendar OAuth, timezone handling, transactional email). Works within **Agile/Scrum** teams following a **test-driven, AI-assisted development** workflow, with a strong focus on code quality, debugging, and delivery. **English C2**. Pursuing a degree in Systems Engineering (UTN). *Signed letter of recommendation available on request.*

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript (ES6+), Python, SQL, HTML, CSS
- **Backend:** Node.js, NestJS, Express.js, REST API design, scalable backend architecture, asynchronous processing, Cron Jobs, webhooks & callbacks
- **Frontend:** React, Next.js, TypeScript, JavaScript, HTML, CSS
- **Mobile:** React Native, Expo
- **AI / ML:** Applied AI, AI feature integration, RAG (Retrieval-Augmented Generation), embeddings / vector search (pgvector), multi-agent LLM orchestration, streaming responses (SSE), LLM integration (GPT, Claude, Gemini), chatbots, AI-assisted development
- **Databases:** PostgreSQL, MongoDB, SQL, TypeORM, Mongoose, Firebase / Firestore, Redis
- **Cloud & Tools:** AWS (EC2, S3 — in progress), Git, GitHub, Linux, Postman / Insomnia
- **Integrations & Automation:** Google APIs (Calendar OAuth, Meet), Stripe API, Resend, Luxon (IANA timezones), external system integration, internal process automation
- **Practices:** Test-Driven Development (TDD) & AI-assisted testing, Object-Oriented Programming (OOP), Agile / Scrum, code reviews, debugging & optimization, technical documentation, SDLC

PROFESSIONAL EXPERIENCE

Full Stack Developer — Internship & Ongoing Collaboration | DualTherapist · Remote

Mar 2026 – Present (*formal internship Mar–Jun 2026; continuing as ongoing project collaborator*)

- **Led the end-to-end development of the scheduling & appointments module** — across **backend, web, and mobile (React Native / Expo)** — for a therapy-management platform, owning backend logic, REST APIs, integrations, and UI.
- Contributed to the platform's **AI service**: built a **RAG pipeline over pgvector** backed by a user-curated knowledge base, and a **multi-agent chatbot with streaming (SSE) responses** that generates personalized therapy-session analyses (written analysis and Mermaid diagrams) grounded in a user-selected theoretical framework; specialized agents each own their own tools across the generation pipeline.
- Integrated **Google Calendar (OAuth, invitations, Meet links)** with rigorous **IANA timezone handling**, plus **Resend** (transactional email) and **Nager.Date** (local holidays).
- Built an advanced **scheduling engine** (daily/weekly/monthly views, flexible availability, working-hours/breaks, booking & cancellation rules, per-patient session limits) and a **schedule versioning system**; built **metrics dashboards** for operational tracking.
- Worked following a **test-driven development (TDD)** approach with **AI-assisted testing** to safeguard code quality, and used **AI-assisted development** (Claude, Gemini CLI, Antigravity) to accelerate debugging,

prototyping, and delivery.

- Contributed to functional definition, UX improvements, and technical decision-making in daily stand-ups within an Agile workflow.

Stack: Node.js, TypeScript, PostgreSQL, React, Next.js, React Native / Expo, REST APIs, RAG / pgvector, multi-agent LLM orchestration, SSE, Google APIs, Luxon, Resend, Firestore

Math & Physics Teacher | La Piero SRL

Jan 2019 – Present

- Design and deliver learning experiences for university-level students, applying analytical problem-solving and the clear communication of complex technical concepts.
- Manage materials and assessments in digital environments (Moodle) — transferable strengths for cross-functional collaboration and stakeholder communication.

Earlier Experience | National Ministry of Education — Orchestras & Choirs Program (2015 – 2019)

Roles in program coordination and music teaching: operations, documentation, logistics, and communication across multiple institutions. *(Full detail on request.)*

PROJECTS

Backend Developer | CleenGo

Nov 2025 – Dec 2025

- Developed **backend services** for an appointment-scheduling and administrative-management platform.
- Automated internal tasks using **Cron Jobs** and asynchronous processes; integrated external services and APIs.
- Improved platform performance and production debugging.
- **Stack:** Node.js, NestJS, PostgreSQL, Redis
- Live: cleengo-front-one.vercel.app · GitHub: github.com/sofiaruiz1801/CleenGo-Back

Backend Developer | E-commerce Platform

Aug 2025 – Sep 2025

- Developed **REST APIs** for products, users, orders, and checkout processes.
- Implemented **authentication and role-based authorization**.
- Designed transactional logic and a **scalable backend architecture**.
- **Stack:** Node.js, TypeScript, PostgreSQL
- GitHub: github.com/sofiaruiz1801/PIM4BE-sofiaRuiz

EDUCATION

- **Systems Engineering** — Universidad Tecnológica Nacional (UTN) · 2025 – Present
- **Full Stack Web Development (800 hrs)** — Henry Bootcamp · 2025 – 2026
- **Chemical Engineering** — Universidad Nacional de Córdoba (UNC) · 2010 – 2020 (≈30% completed)

CERTIFICATIONS & ADDITIONAL TRAINING

- Full-Stack Developer — DualTherapist / SoyHenry formative internship (signed certificate, verifiable)
- CS50's Introduction to Computer Science — HarvardX
- CS50's Introduction to Programming with Python — HarvardX
- CS50's Web Programming with Python and JavaScript — HarvardX
- AWS Cloud Program — In progress

LANGUAGES

- **English** — Proficient (C2)
- **Spanish** — Native
- **Japanese** — Basic (N5)
