PROFESSIONAL PROFILE

Fullstack Developer focused on automation, integrations, and artificial intelligence applied to digital products. Experience developing end-to-end solutions using Node.js, TypeScript, React, PostgreSQL, and REST APIs, as well as AI-based tools such as GPT, Claude, Gemini, and Antigravity to accelerate development and rapid prototyping.

Highly self-taught, proactive, and execution-oriented profile, with strong interest in building scalable solutions, optimizing processes, and applying new technologies to real-world problems. Currently pursuing a degree in Systems Engineering at UTN.

TECHNICAL SKILLS

AI & Innovation

- Claude, GPT, Gemini, Antigravity | AI-assisted development | End-to-end solutions.

Automation & Integrations

- APIs REST | Webhooks | Callbacks | External systems integration | Internal process automation | Stripe API | Luxon | Resend

Development

- Node.js | JavaScript | TypeScript | React | HTML | CSS | Python | NestJS | Express.js

Databases

- PostgreSQL | MongoDB | SQL | TypeORM | Mongoose | Firestore - Firebase

Cloud & Tools

- AWS (EC2, S3 – currently learning) | Git | GitHub | Postman / Insomnia | Linux
-

PROFESSIONAL EXPERIENCE

Backend Developer Intern | Dualtherapist

Mar 2026 – Present

- End-to-end development of key features for a web platform focused on therapy management and appointment scheduling.
- Designed and implemented complete appointments and schedule configuration modules, including backend logic, REST APIs, external integrations, and frontend development.
- Developed an advanced scheduling system with daily, weekly, and monthly calendar views, visual appointment status management, and flexible therapist availability configuration.
- Implemented features for managing working hours, breaks, local holidays, booking/cancellation anticipation, and custom patient session limits.
- Designed a schedule versioning system to allow future operational configuration changes.
- Integrated external services for automation and feature enhancement:
 - Resend for automated email delivery
 - Google APIs + Luxon for timezone detection and management

- Nager.Date for local holiday handling
 - Developed appointment creation and management workflows from both therapist and patient perspectives.
 - Implemented a “My Appointments” section with dynamic filtering by status, date, and user to optimize operational tracking and management.
 - Extensively used AI tools such as Claude, Gemini CLI, and Antigravity to accelerate development, debugging, and iterative prototyping.
 - Actively participated in functional definition, user experience improvements, and autonomous technical problem-solving.

Stack: Node.js, TypeScript, PostgreSQL, React, REST APIs, Luxon, Resend, AI-assisted development
Code under private repository

Math and physics Teacher| La Piero SRL

Jan 2019 - Present

- I design and facilitate learning experiences for university freshmen, applying active learning methodologies and educational technology. My work combines logical analysis, complex problem-solving, and the clear communication of technical concepts. I also manage learning materials and assessments in digital environments (Moodle) and use interactive tools in the classroom, strengthening students' digital skills and their ability to adapt to new technologies
-

Docente Integradora | Programa de Coros y Orquestas del Ministerio de Educación de la Nación

Jun 2016 – Dec 2019

- Coordinated administrative and operational processes for musical groups within the National Ministry of Education's orchestras and choirs program across multiple schools.
 - Managed student documentation, attendance records, schedules, and internal organizational processes for teachers and ensembles.
 - Coordinated communication between teachers, schools, students, and families to support the proper functioning of the program.
 - Organized class schedules, repertoire materials, and logistics for rehearsals, performances, and institutional events.
 - Managed instrument loan processes, inventory tracking, and maintenance coordination for the ensembles.
 - Prepared and submitted administrative documentation related to school activities, performances, and external presentations.
 - Verified teacher billing documentation and coordinated administrative submissions to the Ministry of Education.
 - Supported the organization of school showcase events and student recruitment activities for the program.
 - Acted as a central operational and communication point between educational institutions, teaching staff, and families.
-

Flute Teacher | Programa de Coros y Orquestas del Ministerio de Educación de la Nación

Mar 2015 – Dec 2018

- Taught introductory flute lessons to students of different ages in both individual and small group settings.
 - Planned and prepared technical and educational materials focused on sound development, instrumental technique, and music reading skills.
 - Guided students through orchestral repertoire preparation and supported their participation in ensemble rehearsals.
 - Collaborated with the orchestra director and teaching staff to develop educational strategies and monitor student progress.
 - Participated in community and school showcase events aimed at attracting new students to the program.
 - Promoted musical learning through an inclusive, collaborative, and student-centered approach.
-

PROYECTS

Backend Developer | CleenGo

Nov 2025 – Dec 2025

- Developed backend services for an appointment scheduling and administrative management platform.
 - Automated internal tasks using Cron Jobs and asynchronous processes.
 - Integrated external services and APIs.
- Improved platform performance and production debugging.

Stack: Node.js, NestJS, PostgreSQL, Redis

[Github Repository](#) |

Backend Developer | E-commerce Platform

Aug 2025 – Sep 2025

- Developed REST APIs for products, users, orders, and checkout processes.
- Implemented authentication and role-based authorization.
- Designed transactional logic and scalable backend architecture.

Stack: Node.js, TypeScript, PostgreSQL

EDUCATION

Systems Engineering

Universidad Tecnológica Nacional (UTN)

2025 – Present

Currently attending first-year courses

Full Stack Web Development

Henry Bootcamp

2025 – 2026

Chemical Engineering

Universidad Nacional de Córdoba (UNC)

2010 – 2020

30% of the degree completed

ADDITIONAL TRAINING

- CS50's Introduction to Computer Science – HarvardX
- CS50's Introduction to Programming with Python – HarvardX
- CS50's Web Programming with Python and JavaScript
- AWS Cloud Program – In progress

LANGUAGES

- English – Proficient (C2)
- Japanese – Basic (N5)
